ADA Accessible Special Needs Swing Seat

Colors available: Black, Blue, Green, Red and Yellow

Description:

Full body swing. Although this swing can be used by all children, from babies who are just beginning to sit up on their own to school-aged children weighing up to 125 pounds (52kg), it truly has been designed for children with disabilities movement-limiting handicaps. With its patented, lightweight plastic design, it offers children with special needs the chance to experience the exhilaration of swinging. Designed to help meet the American Disabilities Act guidelines for playground equipment in public recreation.

Measurements: The seat is 14" wide and 11" deep. The back of the seat is 24" high. The knee to foot length is 14" long. The overall length is 45".

Product Wt. 70 lbs - weight limit 125 lbs.

COMPLIES WITH CAN/CSA-Z614-07
